

Printers

SPU has a campus-wide copier/printer solution. Click on the appropriate icon below to learn the specifics about our solution and how it affects you.

Additionally, some departments and offices maintain separate networked or local printers. These printers are separate from the campus-wide copier/printer solution and behave differently. CIS recommends these network and local printers be sold or recycled when the existing ink/toner supply runs out. The campus MFPs provide the most cost-effective and highest-quality printing on campus.

CIS does not recommend bringing a personal printer to campus, nor do we recommend that departments purchase additional printers for their areas.
