

SPSS Statistics & Amos for Windows

These instructions will walk you through downloading and installing both SPSS and Amos on a personal Windows PC.

System Requirements

- Operating System: Windows XP, Windows Vista, or Windows 7, 8.1, 10
- Processor: 1Ghz or higher
- Memory: 1GB or higher
- Free Space on Hard Drive: 1GB or more

The license for SPSS Statistics & Amos expires annually June 30th. The software will continue to work until July 31st. New versions are uploaded automatically in early July.

Steps

1. **Remove all previous versions of SPSS and Amos** from the computer.
2. Click the **Download Now** link on the SPU Download Center page. This will bring up a log in screen. Log in with your SPU Username and Password.
3. The download will either automatically begin or request to save or run on your computer. If prompted please **select save**.
 - a. If the download is automatically canceled before it completely downloads, you may need to **adjust your anti-virus settings**
4. Once downloaded right click the file and select "run as administrator".
5. The software will be listed in your Start Menu as SPSS Statistics 25.
